

LCN[®]

The new 1260 cast iron closer.

Tough, versatile and built to give you more.

Introducing the perfect mix of performance and durability, the 1260 Series closer from LCN. Its cast iron construction delivers unparalleled strength and longevity, and its versatile design means the 1260 works almost everywhere.

Cast iron durability that protects the whole opening.

When the performance of your door closer is compromised your whole door system is at risk. That's because a door closer does more than just close the door. It is an integral component of a safe, secure and strong door system. Only LCN cast iron closers deliver smooth closing and a stronger overall door system. Designed for low to moderate traffic in both interior and exterior applications, the 1260 is ideal for office buildings, hotels, manufacturing facilities, retail shops and other light commercial uses.

LCN 1260 Cast iron gives you more.

Cast Iron	vs.	Aluminum
RELIABLE, SMOOTH DOOR CONTROL LCN cast iron closers have a naturally high graphite content that lubricates pistons with every use. The result: longer closer life and reliable, smooth door control.	Door Control	GRADUAL LOSS OF CONTROL Aluminum closers have soft metal particles that can build up and clog valves. The result: doors that slam, won't close completely or will swing open too far.
NO LEAKS The LCN 1260 delivers advanced V-Shield Seal technology that prevents leaks. In fact, every LCN closer comes with our No-Leak™ guarantee. The result: longer closer life and greater durability.	Leaking	LEAKS, STAINS AND POOR PERFORMANCE Wear residue and build-up of internal particles wears out the o-rings of aluminum closers easily. The result: leaks, unsightly door stains, and doors that slam, causing damage to the door and frame.
GREATER ENERGY EFFICIENCY LCN closers improve energy efficiency by ensuring your doors close properly. And our all-weather fluid acts as an insulator to keep door closer components working smoothly with no need for seasonal adjustments. The result: a more consistent indoor climate and more efficient performance from your HVAC system.	Energy Costs	FLUCTUATING INDOOR TEMPERATURES Doors that don't close correctly can wreak havoc on HVAC systems, causing heat and air conditioning loss. The result: higher energy costs.
DEPENDABLE SECURITY The cast iron in the new LCN 1260 closer can withstand greater internal hydraulic pressure, minimizing long-term wear and allowing smooth, consistent operation. The result: a door that closes securely with each and every use.	Security	DOORS THAT DON'T CLOSE PROPERLY Poor long-term performance of aluminum closers can lead to doors not closing all the way. The result: a security system that fails before it even has a chance to succeed.

Fast, easy installation.

The 1260 comes with a simple peel-n-stick template that you can apply right to the door for quick, easy installation that's right the first time. An optional Quick-fix Kit™ is available for easy retrofit solutions.

The 1260 gives you more.

The 1260 is designed to retrofit perfectly or meet the needs of new construction. In fact, your 1260 can be practically custom built for your project's unique demands.

LCN has built in a host of features that just might make the 1260 the last closer you'll ever need.

- Advanced V-Shield Seal for longer life and durability
- Standard and custom powder coat finishes
- Optional slim line cover
- Optional SRI primer for corrosive environments
- Meets ADA requirements
- Tested and certified under ANSI A156.4, Grade 1
- Optional delayed action

Spring Adjust

Fits sizes 1-5, minimizing inventory

Arms

- Regular
- Parallel
- Long
- Hold open
- EDA
- HEDA
- Cush
- HCush
- SCush
- SHCush

Regulation

- End regulation
- Optional delayed action

Mounting Type

- Regular
- Parallel Arm
- Easily retrofits to most common commercial footprint
